

Disposal of QuikRead go Instrument in Denmark

When your QuikRead go Instrument has come to end of its life cycle, please follow these instructions to dispose the old device appropriately. Please note that these instructions apply **only for customers within Denmark**.

Take-back and recycling

When your QuikRead go Instrument has come to end of its life cycle and you need to recycle it, please contact: <https://b2btool.earn-service.com/aidian-shipment/parcelselect> and fill-out the questionnaire. A file will then be created containing the address data of the responsible recycling company, the sender details (your data) and other information necessary for processing. Please print out this file and attach the printout in a clearly visible position on the consignment containing the waste electrical equipment for dispatch. You will also receive this information and the file separately by e-mail.

The WEEE directive (Waste of Electrical and Electronic Equipment; 2012/19/EU), implemented in Denmark law by the Statutory Order on placing on the market of electrical and electronic equipment and management of waste electrical and electronic equipment (the WEEE Order) no. 1566 of 12 December 2022, aims to reduce the increasing amount of electronic waste from electrical and electronic equipment that is no longer used. The objective is to avoid, reduce, and dispose of the increasing quantities of electronic waste in an environmentally sound manner through extended producer responsibility. Additionally, Regulation (EU) 2023/1542 of the European Parliament and of the Council of 12 July 2023 concerning batteries and waste batteries (known as the new 'EU Batteries Regulation') and of the Danish Statutory Order no. 986 of 20 June 2025 aim to ensure that batteries are disposed of in an environmentally sound manner and that battery manufacturers meet their responsibilities for disposal. Aidian is committed to the obligations of these regulations, and has concluded a recycling agreement with the European Advanced Recycling Network (EARN Elektroaltgeräte Service GmbH) so to organise the transport, preparation for re-use, recycling and recovery of WEEE and batteries with certified recycling partners. Producer bears the costs for the treatment, recycling and recovery of Producer products.
